

# Great Backyard Bird Count 2019

7th Edition

## What

GBBC India is the Indian implementation of the global Great Backyard Bird Count, which runs for 4 days every February. Indian birders have participated in the GBBC since the event went worldwide in 2013.

## Why

These annual snapshots of bird populations help answer a variety of important questions, including:

- 1) How are birds distributed?
- 2) How are they affected by changes in habitat and weather?
- 3) Are populations and distributions changing from year to year?

## How

- 1) Go birding for at least 15 min,
- 2) List and count all the species you see
- 3) Login to [www.ebird.org/india](http://www.ebird.org/india) and submit your species list.

## When

15-18 February 2019
